# Enterprise Human Resources

Payroll Simulation

(Creating A Variant)

Tutorial

Because of the screen change in Enterprise to the Payroll Simulation, your old variant will not be compatible. Therefore, you will need to recreate your variant and save with a new name. This tutorial will guide you in creating a variant for the Payroll Simulation.

Payroll Simulation Variant

1. Follow the menu path Human Resource > Payroll > Americas > USA > Payroll > Simulation or enter PC00_M10_CALC_SIMU in the command field

AASIS Support Center, Diane Hill
December, 2003

2

Payroll Simulation Variant

Program **Edit** **Goto** **System** **Help**

Payroll Driver (USA)

Selections from   ⇨   Search helps

Payroll period

Payroll area   11   12/07/2

○ Current period   26 2003

● Other period   1 2004

2. Enter the appropriate Payroll area. 11 for Bi-Weekly or 12 for Semi-Monthly

3. Click on other period and enter the payroll period number and year

Cost center

General program control

Reason for payroll

Off-cycle payroll

Schema   U000

Forced retro.accounting as of

☑ Test run (no update)

Payroll Simulation Variant

Payroll Driver (USA)

| Selections from | ⇨ | Search helps |

Payroll period

Payroll area	11	12/07/2003	To	12/20/2003
○ Current period	26 2003
● Other period	1 2004

4. Enter the desired Selection options

Selection

Personnel number		⇨
Personnel area	FA02	⇨
Business area		⇨
Payroll area	11	⇨
Cost center		⇨

5. Enter the appropriate payroll area again.

General program control

Reason for payroll	
Off-cycle payroll	
Schema	U000
Forced retro.accounting as of	
✔ Test run (no update)	

There are no From and To input fields under the 'Selection' criteria. To add multiple entries, you will need to click on the multiple selection icon ⇨.

Payroll Simulation Variant

Program   Edit   Goto   System   Help   **SAP**

Payroll Driver (USA)

Personnel area	FA02
Business area	
Payroll area	11
Cost center	

General program control

Reason for payroll	
Off-cycle payroll	
Schema	Z200
Forced retro.accounting as of	
☑ Test run (no update)	

> **6. Enter Z200 in the 'Schema' field**

Log

- ☐ Display log
- ☐ Display log for time management additionally

Display variant for log

Remuneration statement parameters

- ○ Display variant Rem. stateme

It is still necessary for you to enter the correct schema which is Z200. Remember if the schema changes, there will always be a system message alerting you to this.
